

Dual Smart / Mag-Stripe Card Reader

Onity

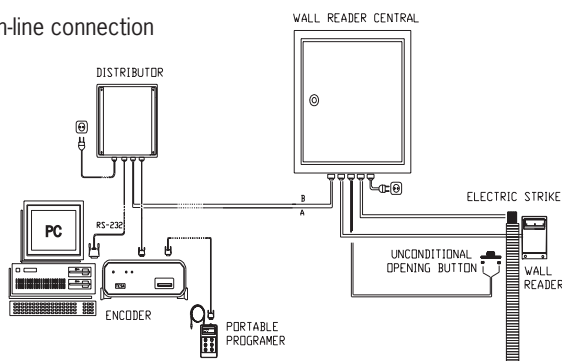

'innovative thinking'

TESA Entry Systems

- Allows both on-line and off-line configurations
- Reads magnetic and smart cards simultaneously and sends the information to the wall reader control unit (on- or off-line)
- Red and green LED's to indicate status
- A 12 V AC heater to function below 0° C (32° F) is available as an option
- Specially designed for outdoor installations
- Size: 80 x 115 x 40 mm
3,2 x 4,5 x 1,5 -inches
- Consumption: 20 mAh (powered by the 12 V DC of the central)
- Requirement: on-line or off-line wall reader control unit

On-line connection

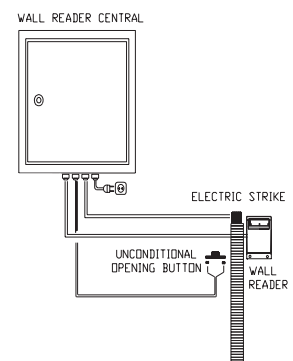

Secure your property with card readers at perimeter doors, elevators, parking areas, pools, health facilities, etc.

The on-line card readers allow reception personnel to check openings as well as authorize or deny card access in real time. Non-volatile memory supports an audit trail of the last 8 000 openings, and an anti-passback function is also incorporated.

The off-line card readers allow only authorized card holders to gain access, and the audit trail retains the last 500 openings.

Off-line connection

Card Readers are programmable, just like any Onity lock. Perfect for interior or exterior use, readers can be equipped optionally with a heater for temperatures below 0 °C (32° F).

There are also special versions for elevators which can optionally incorporate an area control board that allows filtering the access to eight different areas from one single reader.

Compatible with HT28 Smart electronic locking system.
